CAREER OBJECTIVE

Final-year engineering student specializing in CSBS with a strong foundation in software development and programming. Seeking an entry-level opportunity to apply technical skills, problem-solving abilities, and continuous learning in a growth-oriented organization.

EDUCATION

B.Tech in Computer Science and Business Systems

Panimalar Engineering College, Chennai, India | CGPA: 8.2 / 10 — 2023 – 2027

Higher Secondary Certificate (Class XII)

Bharathidasan Matriculation Hr Sec School, Kanchipuram, India | percentage: 82% — 2022 – 2023

TECHNICAL SKILLS

Web Technologies: HTML, CSS, JavaScript.

Programming Languages: Java.

Database: MySQL.

Tools: Git, GitHub, VS Code, Eclipse.

PROJECTS

AI Chatbot Platform — React.js, Node.js, MongoDB, Tailwind CSS

- Built a full-stack AI chatbot featuring real-time web search, AI image generation, community image sharing and a credit-based usage system using React.js and Node.js.
- Implemented JWT authentication, daily credit reset and Stripe-integrated credit purchase plans (Basic, Pro, Premium) to simulate a production-grade SaaS platform.
- Integrated Tavily Search API with Google Gemini AI to deliver accurate real-time responses by fetching live web data before every AI completion request.

Web-Log Security Analyzer — HTML, CSS, JavaScript, MySQL

- Built a rule-based security dashboard with multi-vector threat detection, dynamic risk scoring and real-time IP visualization detecting brute-force, SQLi, XSS, directory traversal and authentication flooding.
- Implemented a six-module detection engine with weighted composite scoring classifying flagged IP addresses into HIGH, MEDIUM and LOW severity tiers for immediate analyst prioritization.
- Developed a checkbox-driven selective analysis interface enabling targeted security investigation by activating only relevant detection modules without full pipeline execution.

INTERNSHIP

Java Programming Intern – Vault of Codes — 05th Nov – 05th Dec 2025

- Engineered a secure user authentication module using Core Java, implementing customer number and PIN verification, while applying Object-Oriented Programming (OOP), input validation, exception handling, and File I/O to ensure reliable and secure access to ATM banking operations.
- Enhanced coding and debugging skills by completing projects that involved developing software solutions, improving overall code efficiency, and enabling faster deployment cycles with fewer bugs.
- Strengthened software design and teamwork abilities by collaborating on development activities to build efficient and user-friendly application.

CERTIFICATION

- Java Programming – Udemy: Completed the beginner-level course covering core Java concepts and practical coding.
- SQL and Relational Databases – Cognitive Class (IBM): Completed a course on relational databases and SQL.
- Technology Job Simulation – Deloitte: Completed practical tasks in coding and development through Forage.
- Networking Basics – Cisco: Completed a course on core networking concepts and Cisco Packet Tracer.
